

CUSTOMER JOURNEY MAP

Team ID: SWTID-2026-6530

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Journey Phase	Stage 1 – Request Laptop	Stage 2 – Approval & Task Creation	Stage 3 – Hardware Configuration
Actions	• User opens Service Catalog. • Selects Standard Laptop. • Places the order.	• Request is submitted for approval. • User waits for approval. • After approval, Flow Designer creates a Catalog Task.	• Hardware team receives the assigned task. • Configuration task is processed. • User checks the task/request status.
Touchpoint	• ServiceNow Service Catalog • Standard Laptop item • Order Now option	• Request record • Approvers section • Flow Designer • Catalog Task	• Hardware assignment group • Catalog Task record • Task status
Customer Thought	“I hope I can submit my laptop request easily.”	“I hope the approval and task creation happen quickly.”	“I hope the Hardware team configures my laptop without delay.”
Customer Feeling	Hopeful and expectant	Concerned about waiting time	Satisfied when the task is processed quickly
Process Ownership	IT Procurement / Service Catalog	IT Procurement / Approval process / Flow Designer	Hardware Team
Opportunities	• Make the request process simple. • Provide a clear Standard Laptop catalog item. • Reduce unnecessary manual steps.	• Automate task creation after approval. • Automatically assign the task to Hardware. • Reduce manual intervention.	• Provide clear task status. • Ensure timely configuration. • Improve resource allocation and reduce user waiting time.

Key Improvement Opportunity

The main improvement opportunity is to **automate the process between approval and hardware configuration**. Using Flow Designer, a Catalog Task can be automatically

created after approval and assigned to the **Hardware** group. This supports the project's objective of reducing manual intervention and improving procurement efficiency.
