

DATA FLOW DIAGRAM (DFD)

Team ID: SWTID-2026-6530

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Level 0 – Data Flow

External Entities

1. **Customer / Employee**
2. **IT Procurement Team**
3. **Hardware Team**

Processes

P1 – Submit Standard Laptop Request

P2 – Approve Service Request

P3 – Create Catalog Task using Flow Designer

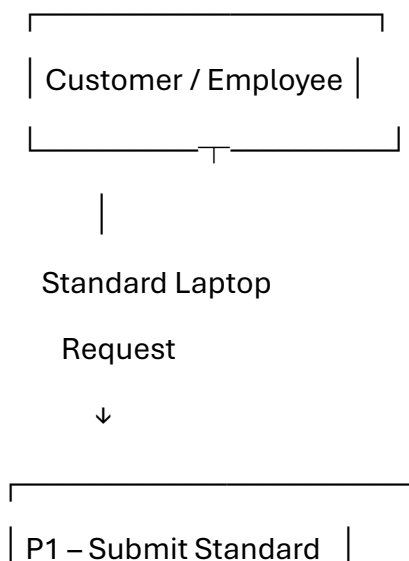

P4 – Configure Standard Laptop

Data Stores

D1 – Service Request Database

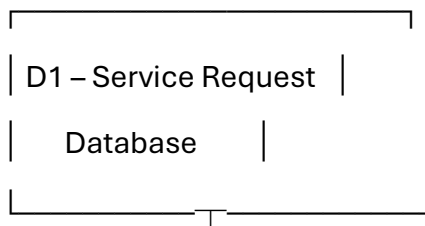

D2 – Catalog Task Database

Data Flow Description

From	Data	To
Customer / Employee Standard Laptop Request P1 – Submit Request		
P1	Request Data	D1 – Service Request Database
D1	Service Request	P2 – Approval
P2	Approved Request	P3 – Flow Designer
P3	Catalog Task	D2 – Catalog Task Database
D2	Configuration Task	P4 – Laptop Configuration

From	Data	To
P4	Configuration Status	Hardware Team
Hardware Team	Updated Task Status	D2 – Catalog Task Database

Process Summary

Customer / Employee submits a Standard Laptop request through the Service Catalog.

The request is stored as a **Service Request** and goes through the approval process.

After approval, **Flow Designer automatically creates a Catalog Task** with the required description and assigns it to the **Hardware** group.

The Hardware team then performs the laptop configuration and updates the task status.

This represents the automated flow described in the project documentation, where a Service Catalog trigger creates a Catalog Task and assigns it to the Hardware group after approval.

DFD Components

DFD Component	Project Component
External Entity	Customer / Employee, IT Procurement Team, Hardware Team
Process	Submit Request, Approval, Flow Designer Task Creation, Laptop Configuration
Data Store	Service Request Database, Catalog Task Database
Data Flow	Request Data, Approval Data, Catalog Task, Configuration Status
