

NO. OF FUNCTIONAL FEATURES INCLUDED IN THE SOLUTION

Team ID: SWTID-2026-6530

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Functional Features Overview

S.No	Feature Name	Feature Description	Module / Component	Status	Marks	Contribution
1	Standard Laptop Service Catalog	Provides the Standard Laptop option for users to place a procurement request.	Service Catalog	Done	1	Allows users to initiate the laptop procurement process.
2	Laptop Request & Approval	Allows the Standard Laptop request to be submitted and approved before processing.	Request / Approval	Done	1	Ensures requests are reviewed before task creation.
3	Flow Designer Automation	Automatically starts the configured workflow when a Service Catalog request is triggered.	Flow Designer	Done	1	Reduces manual intervention in the procurement process.
4	Catalog Task Creation	Automatically creates a Catalog Task for laptop configuration after approval.	Create Catalog Task	Done	1	Ensures configuration work is generated automatically.
5	Hardware Assignment	Assigns the laptop configuration task	Assignment Group	Done	1	Ensures the responsible

S.No	Feature Name	Feature Description	Module / Component	Status	Marks	Contribution
		to the Hardware assignment group.				Hardware team receives the task.
6	Laptop Configuration Details	Updates the task with the required short description and description.	Catalog Task	Done	1	Clearly communicates the laptop configuration requirement.
7	Flow Activation & Integration	Activates the Standard Laptop Task Flow and associates it with the Standard Laptop catalog item.	Flow Designer / Service Catalog	Done	1	Connects the automation with the actual laptop request process.
8	Task Status Tracking	Allows users/team members to open the Catalog Task and view its status, short description and assignment group.	Catalog Task	Done	1	Provides visibility into the progress of the laptop configuration task.

The project documentation describes the Standard Laptop service catalog ordering process and the approval/request workflow.

It also specifies the automated **Create Catalog Task** action, the laptop configuration description, the **Hardware** assignment group and the **Approved** condition.

Feature Summary

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	8
Additional / Nice-to-Have Features	0

Metric	Count / Value
--------	---------------

Features Tested & Verified	8
----------------------------	---

The project documentation demonstrates verification by opening the generated Catalog Task and checking its updated status, short description and assignment group.

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Standard Laptop Service Catalog, Laptop Request
2	Backend / Logic	4	Flow Designer Automation, Approval, Catalog Task Creation, Hardware Assignment
3	Database / Storage	0	Not specifically documented
4	API / Integration	1	Flow Designer integration with Service Catalog
5	Security / Authentication	1	Request approval / authorization process

Overall Functional Feature Summary

The solution includes **8 functional features** covering the Standard Laptop request, approval, automation, Catalog Task creation, Hardware assignment and task tracking.

The implemented automation addresses the project's main objective of reducing manual intervention and improving the efficiency of the IT procurement process. The project conclusion states that the automated workflow helps provide timely laptop configuration and improves resource allocation and user experience.
