

SCALABILITY & FUTURE PLAN

Team ID: SWTID-2026-6530

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Current System Limitations

S.No	Limitation	Impact	Priority to Address
1	The current workflow is designed mainly for standard laptop requests.	Other types of IT hardware requests may require separate workflows.	Medium
2	The workflow depends on ServiceNow configuration and availability.	Workflow execution may be affected if the ServiceNow instance is unavailable.	High
3	The current solution focuses on automatic task creation and Hardware group assignment.	Further automation may be required for complete procurement and delivery tracking.	Medium

Scalability Plan

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Handles standard laptop requests through ServiceNow Service Catalog.	Extend the automated workflow to support a larger number of users and multiple IT hardware requests.
2	Data Storage	Request, approval, Requested Item, and Catalog Task details are stored in ServiceNow.	Improve record management and reporting as the number of procurement requests increases.
3	Performance	Flow Designer automatically creates and assigns tasks after approval.	Optimize workflows and reduce unnecessary manual processing to maintain efficient execution with increased requests.

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
4	Security	Access is controlled through ServiceNow user access and permissions.	Strengthen role-based access and ensure only authorized users can create, approve, or manage procurement requests.

Future Roadmap

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Automate Standard Laptop request, approval, and Hardware task assignment.	Current Phase	Reduce manual intervention and configuration delays.
Phase 2	Extend automation to other standard IT hardware requests.	Future	Provide a common automated procurement process for multiple hardware types.
Phase 3	Add enhanced procurement tracking and reporting.	Future	Improve visibility of request status and resource utilization.
Phase 4	Integrate additional automation for procurement and delivery processes.	Long Term	Provide a more complete and efficient end-to-end IT procurement workflow.

Future Vision

Standard Laptop Automation → Multiple Hardware Automation → Procurement Tracking → End-to-End IT Procurement Automation
